I would completely recommend this game to Animal Crossing fans if it weren't for one thing:  
This game has bugs. The game breaking kind.

If you play the beta (that is, controller support) you will eventually get locked inside your house.  
When I stop playing the beta I can leave my house, but I still can't turn in an important quest to the mayor, so I can no longer progress the game. Not to mention the many, many non game breaking bugs.

The developers used to be very vocal and helpful, but they've gone silent on these issues, not answering questions or concerns for about a year now. Others have my same problems, and at the moment it doesn't feel like they'll fix any of them.

I had planned on eventually buying copies for my aunt, sister and girlfriend as the game is very good.  
Do not buy this game. It is broken.

I will be requesting a refund.. Requires you to wait a lot like a mobile app
